

Purpose: An established business process around Financial Conflict of Interest (fCOI) is necessary in order to ensure compliance with revised [NIH fCOI guidelines](#) and the [University's fCOI policy](#). Because financial conflicts of interest may corrode the school and the University's reputation and thus erode confidence in the University and diminish its trustworthiness and stature, the school must ensure that faculty are made aware of such conflicts and are dutiful in reporting them. Reported conflicts must receive scrupulous attention and management.

Guidelines & Considerations:

- a) **Annual Certification:** All persons holding faculty and academic appointments at the school are responsible for filing an annual disclosure and certification of their financial interests and related outside activities. This process is administered by the [Office of Faculty Affairs](#). Investigators are also advised to review the [HSPH Implementation Plan for the Harvard University Policy on Individual Financial Conflict of Interest for Persons Holding Faculty and Teaching Appointments](#).
- b) **Requirements at Proposal Stage:** Each Investigator who is planning to participate in PHS+ funded research as well as faculty and academic appointees for non-PHS+ funded research *must* disclose to SPH's designated official their significant financial interests (and those of their spouse and dependent children) no later than the date of submission of the Institution's proposal for funded research.
- c) **Requirements at Award Stage:** Prior to expenditure of any funds under a PHS+ sponsored research project, the designated official will determine whether an Investigator has any significant financial interests related to the funded research; determine whether a financial conflict of interest exists; and, if so, develop and implement a management plan that will specify the actions that have and will be taken to manage such financial conflict of interest. In addition, all Investigators must have completed fCOI training. For non PHS+ sponsored research projects, all faculty and academic appointees must have an updated disclosure on file.

Key Definitions

Investigator means the **project director or principal Investigator** and **any other person**, regardless of title or position, **who is responsible for the design**, conduct, or reporting of research funded or proposed for funding by the NSF or any agency that follows 42 CFR Part 50, Subpart F (see the updated listing at the FDP fCOI link, above). This may include, for example, **collaborators or consultants**.

For the definition of *Significant financial interest*, please refer to the [HSPH Implementation Plan for the Harvard University Policy on Individual Financial Conflict of Interest for Persons Holding Faculty and Teaching Appointments](#).

PHS+ refers to all PHS agencies (NIH, CDC, HRSA, etc.) plus NSF and others that use PHS regulations including American Heart Association, American Cancer Society, Arthritis Foundation, Susan G. Komen Foundation and Alliance for Lupus Research. For a complete list, visit this [link](#).

Standards of Service:

- *Investigators* must update their annual certifications within 30 days of a new financial interest arising and must complete training prior to engaging in sponsored research.
- Collaborators and subcontractors must report any financial conflicts of interest to SPH prior to signing the subcontract agreement or within 30 days of identification.
- SPH must provide fCOI reports to PHS regarding all financial conflicts of interest of all investigators and subrecipient *Investigators* prior to the expenditure of funds and within 60 days of any subsequently identified fCOI.
- PHS *investigators* **only** must disclose the occurrence of travel related to their institutional responsibilities and paid for by anyone other than government agencies, higher institutions or hospitals within 30 days of travel.

Process Steps

Step	Role	Task/Activity
PROPOSAL STAGE		
1	PI	Identifies funding opportunity and determines which personnel are PHS+ <i>Investigators</i> .
2	GM	Enters proposal into GMAS and populates research team including PHS+ <i>Investigators</i> .
4	Automated (no action)	Generates fCOI approvals for all PHS+ <i>Investigators</i> and HU faculty. HU <i>Investigators and faculty/academic appointees</i> not already in annual fCOI system are automatically added to the system. fCOI status is fed to GMAS.
5	Automated (no action)	An email is sent to <i>Investigators</i> who have already filed their annual report notifying them to update it if applicable. Those who have not filed are notified to complete it. The date of the last filed fCOI disclosure & approval status is exported automatically to GMAS from Annual fCOI system.
6	<i>Investigators</i>	<i>Investigators and faculty/academic appointees</i> on grant update or complete fCOI disclosure in annual system.
7	GM	For non Harvard Personnel listed as <i>Investigators</i> , requests they complete an fCOI form and that they read the training document . Saves completed forms in S drive. OR if non HU <i>investigators</i> are part of a subcontract and they have their own policy (but non FDP), request they complete this form and upload to the GMAS request repository in a COI folder. If they are part of the FDP Clearinghouse , makes a note in the comments section of the request “X institution part of FDP Clearinghouse”.
8	GM	Confirms all <i>Investigators/faculty & academic appointees</i> have an updated annual disclosure on file prior to submitting the proposal to SPA for review.
9	SRA	Reviews that all <i>Investigators/faculty & academic appointees</i> on grant have an updated fCOI disclosure on file. If complete, finalizes proposal review.
10	AD	Submits/signs proposal.
AWARD STAGE		
11	OPS	Receives notice from sponsor in response to request for funding. If not funded, update request status to not funded and end here. If funded, logs notice of award.

12	Automated (no action)	Department Administrator role in GMAS receives a to-do and e-mail when the award notice is logged notifying them that the research team needs to be confirmed.
13	GM	Verifies research team in GMAS accurately reflects <i>Investigators</i> on project and confirms TBD <i>Investigators</i> if applicable.
14	GM	Confirm research team via request home screen in GMAS using <Confirm research team> button. Hit button and then it will allow you to edit.
15	Automated (no action)	New HU <i>Investigators/faculty & academic appointees</i> automatically added to annual fCOI reporting system and notified via email to complete disclosure. Existing <i>Investigators/faculty & academic appointees</i> e-mailed to update their disclosures.
16	<i>Investigators</i>	Enters or updates disclosures.
17	Automated (no action)	GMAS updated with fCOI approval statuses based on annual fCOI system. Sends e-mail or report to SPH DIO with approvals in “needs review” status. NOTE: for non competing continuations, SRA must request review be done because e-mails will not be generated automatically from GMAS.
18	SPH DIO	Reviews fCOI reports with status “needs review” alongside grant info in GMAS (including non Harvard <i>investigators</i> if applicable).
19	SPH DIO	If no conflict is determined, flips fCOI report status to “No Conflict” in annual system. If conflict is determined, discusses with <i>Investigator</i> ways to eliminate, reduce or manage conflict.
20	SPH DIO	Notifies sponsor of conflict and actions taken to reduce, eliminate, or manage.
21	SPH DIO	Flips fCOI report status to “Eliminated”, “Reduced”, or “Managed” and logs notes and management plan in annual system.
22	Automated (no action)	Status of most recent fCOI disclosure exported automatically to GMAS from Annual system.
23	SRA	Reviews approvals prior to award setup. Ensures <i>Investigators</i> have completed training by checking training list on shared drive.
24	SRA	Proceeds to account setup/agreement with sponsor signed.
25	SRA	For subcontractors that do not have their own fCOI policy, ensure subagreement contains appropriate fCOI language.
POST AWARD		
26	GM	During the course of the project, updates GMAS research team with any new <i>Investigators</i> that join project and ensures disclosures are complete and any fCOI managed prior to commencement of work on the project. Research team is edited from the Segment Home <Research Staff> section.
27	<i>Investigators</i>	During the course of the project, PHS <i>investigators</i> only must disclose the occurrence of travel related to their institutional responsibilities and paid for by anyone other than government agencies, higher institutions or hospitals. The disclosure is completed within a module of the annual fCOI reporting system and must be done within 30 days of travel. Travel disclosures must be done prior to proposal submission and then regularly as needed after that. Threshold of \$5,000 per calendar year per entity.
